Winexpert is the producer of all wine ingredient kits we stock. We have the most recent product guides available.

Please note: For all kits - additives included, no acid titration required. Just add water! It's easy, kinda like color-by-number for adults with wine.

(1-10) indicates the sweetness level of the kit ie 1=semidry, 2=med dry, 3=semisweet, etc. If there is no number listed assume it is dry.

Island Mist Premium Fruit Flavored Wine Kits, 7.5 Liter, yield 6 US gallons 4 to 6 week kit, from start to finish.*A combination of natural fruit flavoring and concentrate which produce a light alcohol (6.5%) drink that**is lighter and more fruity than table wines. All kits finish semi-dry to semi-sweet.*

Winemaker's Dried & Liquid Yeast

Red Star freeze-dried wine yeast- packaged in 5 gram foil sachets. Enough for 5 to 6 gallons of must. \$0.80 each

Montrachet (Saccharomyces Cerevisiae)

Guarantees a quick start of the fermentation. Good alcohol resistance (till 15% vol.), large temperature range (15°C to 35°C, 59°F to 95°F). Ideal strain for big volumes of wine when looking for a secure fermentation.

Pasteur Champagne (Saccharomyces Bayanus)

Strong strain with a very high alcohol tolerance (>16% vol.). Used to avoid sluggish fermentation and to restart stuck ones with remaining residual sugars. Recommended for sparkling wines processed by traditional or Charmat methods.

Cote Des Blanc (Epernay 2 - Saccharomyces Cerevisiae)

Fast fermenting strain that ensures a regular fermentation even at low temperature (12°C to 14°C, 53°F to 57°F). Alcohol tolerance: >14% vol. Allows an optimum aromatic expression for the production of wines derived from neutral grape cultivars.

Premier Cuvee -formerly known as Prise De Mousse (Saccharomyces Bayanus)

The fastest, cleanest and most neutral fermenter. High tolerance to ethanol (till 18% vol.) and free sulphur dioxides. Performs well for restarting stuck fermentations.

Pasteur Red (Saccharomyces Cerevisiae)

Good alcohol resistance (till 15% vol.). Recommended for the vinifications of high quality red wines aged in oak barrels particularly Cabernet, Merlot and Shiraz grape families and to all full bodied wines.

Lalvin freeze-dried wine yeast- packaged in 5 gram foil sachets. Enough for 5 to 6 gallons of must. \$0.95 each

71B-1122

For producing wines with a fruity aroma. Ideal for concentrates. 14% alcohol tolerance.

K1-V116

All purpose. For producing wines from fresh grapes and fruit. Over 18% alcohol tolerance.

EC-1118

For producing all white wines, sparkling wines, ciders & to restart stuck fermentations. Over 18% alcohol tolerance.

RC-212

For producing red wines of smooth character & rounded structure. 12 - 14% alcohol tolerance.

ICV-D-47

For producing superior quality white wines. Ideal for dry & fruity white wines. Alcohol tolerance to 15%.

White Labs Liquid Yeast for Brewers & Winemakers

\$8.75 per tube or \$8.40 each for 2+

White Labs yeast is tested to be over 95% viable, 100% free of wild yeast, aerobic bacteria & anaerobic bacteria. Each vial contains a "pint starter" of yeast & is designed to be added directly to 5 gallons of wort or must. The shelf life is a minimum of four months from the "Best Before" date on the vial, and if refrigerated will stay alive for over a year. Best results are found if used before the "Best Before" date.

The alpha acid "rating" on hops describes the weight of the hop that is made up of alpha acids. Hops with a higher alpha acid content will contribute more bitterness than a low alpha hop when using the same amount of hop. Alpha acids will vary from time to time. % listed is current at time of printing.
