Cryo Hops LupuLN2 - LupuLN2 is the concentrated lupulin of whole-leaf hops containing resins and aromatic oils. It is designed to provide intense hop flavor and aroma, enabling brewers to dose large quantities of hops without introducing astringent flavors or vegetative cone material. LupuLN2 offers twice the resin content of traditional whole-leaf and hop pellet products, and should be dosed at approximately half the amount by weight.

Priced per ounce - pre-weighed bags only
